

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

LISTING OF CLAIMS:

1-10. (Canceled)

11. (Currently Amended) A laminated glazing, for use in a vehicle, comprising consisting essentially of two plies of glass, at least one of which is body tinted, a transparent plastic with a sheet of interlayer laminated therebetween between the plies of glass, wherein at least one ply of glass or the sheet of interlayer material is body tinted, and a low emissivity coating on the interior surface of the glazing.

12-34. (Canceled)

35. (New) A laminated glazing, for use in a vehicle, consisting essentially of two plies of glass, at least one of which is body-tinted, a body-tinted plastic interlayer laminated between the plies of glass, and a low emissivity coating on the interior surface of the glazing.

36. (New) A laminated glazing, for use in a vehicle, consisting essentially of two plies of glass, both of which are clear glass, a body-tinted plastic interlayer

laminated between the plies of glass, and a low emissivity coating on the interior surface of the glazing.

37. (New) A laminated glazing as claimed in claim 11, wherein the body-tinted glass has a colourant portion including 0.5 to 4.0 % (by weight of the glass) of total iron (calculated as Fe_2O_3), 0.05 to 1.6 % by weight of ferrous oxide (calculated as FeO), 5 to 350 ppm by weight of cobalt oxide (calculated as Co_3O_4), a visible light transmission of 75 % or less and a transmitted energy of 45 % or less at 2.1 mm.

38. (New) A laminated glazing as claimed in claim 37, wherein the other ply of glass is body-tinted glass which has a colourant portion including 0.4 to 4.0 % (by weight of the glass) of total iron (calculated as Fe_2O_3), 0.05 to 1.6 % by weight of ferrous oxide (calculated as FeO), a visible light transmission of 88 % or less and a transmitted energy of 72 % or less at 2.1 mm.

39. (New) A laminated glazing as claimed in claim 35, wherein the interlayer material is tinted to have a visible light transmission of 35 % or less at a thickness of 0.76 mm.

40. (New) A laminated glazing as claimed in claim 39, wherein the interlayer material is tinted to have a transmitted energy of 25 % or less at a thickness of 0.76 mm.

41. (New) A laminated glazing as claimed in claim 11, wherein the interlayer material is infra-red absorbing.

42. (New) A laminated glazing as claimed in claim 11, wherein the glazing has a thickness in the range from 3 mm to 10 mm.

43. (New) A laminated glazing as claimed in claim 42, wherein each ply has a thickness in the range from 2 mm to 3.5 mm.

44. (New) A laminated glazing as claimed in claim 11 having a visible light transmission of 50 % or less and a transmitted energy of 30 % or less.

45. (New) A laminated glazing as claimed in claim 44 having a visible light transmission of 35 % or less and a transmitted energy of 20 % or less.

46. (New) A laminated glazing as claimed in claims 11 having a visible light transmission of 70 % or more and a transmitted energy of 60 % or less.

47. (New) Utilizing a laminated glazing as claimed in claim 11 as a windscreen.

48. (New) A laminated vehicle roof glazing, being a glazing as claimed in claim 11, wherein one ply of glass is an outer ply of tinted glass and the other ply of glass is an inner ply of clear glass carrying the low emissivity coating.

49. (New) A laminated vehicle roof glazing as claimed in claim 48, wherein the low emissivity coating is a pyrolytic coating.

50. (New) A laminated vehicle roof glazing as claimed in claim 48 having a visible light transmission of at least 15% and a total solar heat transmission not more than 15% greater than the visible light transmission.

51. (New) A laminated glazing as claimed in claim 35, wherein the body-tinted glass has a colourant portion including 0.5 to 4.0 % (by weight of the glass) of total iron (calculated as Fe_2O_3), 0.05 to 1.6 % by weight of ferrous oxide (calculated as FeO), 5 to 350 ppm by weight of cobalt oxide (calculated as Co_3O_4), a visible light transmission of 75 % or less and a transmitted energy of 45 % or less at 2.1 mm.

52. (New) A laminated glazing as claimed in claim 36, wherein the interlayer material is tinted to have a visible light transmission of 35 % or less at a thickness of 0.76 mm.

53. (New) A laminated glazing as claimed in claim 35, wherein the interlayer material is infra-red absorbing.

54. (New) A laminated glazing as claimed in claim 36, wherein the interlayer material is infra-red absorbing.

55. (New) A laminated glazing as claimed in claim 35, wherein the glazing has a thickness in the range from 3 mm to 10 mm.

56. (New) A laminated glazing as claimed in claim 36, wherein the glazing has a thickness in the range from 3 mm to 10 mm.

57. (New) A laminated glazing as claimed in claim 35 having a visible light transmission of 50 % or less and a transmitted energy of 30 % or less.

58. (New) A laminated glazing as claimed in claim 36 having a visible light transmission of 50 % or less and a transmitted energy of 30 % or less.

59. (New) A laminated glazing as claimed in claims 35 having a visible light transmission of 70 % or more and a transmitted energy of 60 % or less.

60. (New) A laminated glazing as claimed in claims 36 having a visible light transmission of 70 % or more and a transmitted energy of 60 % or less.

61. (New) Utilizing a laminated glazing as claimed in claim 35 as a windscreen.

62. (New) Utilizing a laminated glazing as claimed in claim 36 as a windscreen.

63. (New) A laminated vehicle roof glazing, being a glazing as claimed in claim 35, wherein one ply of glass is an outer ply of tinted glass and the other ply of glass is an inner ply of clear glass carrying the low emissivity coating.

64. (New) A laminated vehicle roof glazing, being a glazing as claimed in claim 36, wherein one ply of glass is an outer ply of tinted glass and the other ply of glass is an inner ply of clear glass carrying the low emissivity coating.

65. (New) A laminated glazing as claimed in claim 51, wherein the other ply of glass is body-tinted glass which has a colourant portion including 0.4 to 4.0 % (by weight of the glass) of total iron (calculated as Fe_2O_3), 0.05 to 1.6 % by weight of ferrous oxide (calculated as FeO), a visible light transmission of 88 % or less and a transmitted energy of 72 % or less at 2.1 mm.

66. (New) A laminated glazing as claimed in claim 35, wherein the interlayer material is infra-red absorbing.

67. (New) A laminated glazing as claimed in claim 36, wherein the interlayer material is infra-red absorbing.
